TEAM: could we add a net previous 'arrow' in the position shown.

Please see below a suggested design for the same. If there is a better design option we can consider that too.

Auth Code

Enter This If Applicable

TEAM: Could we have
this in our theme blue
color (for all forms)

P2

The screenshot shows a web form with two columns. The left column has a 'Phone Number *' field containing '123'. Below it is a dropdown menu with 'Auth code' selected. A red error message box is displayed over the phone number field, stating: 'Please match the requested format. provide a valid phone number'. The right column has a 'Comments' field containing 'aaq' and an 'Auth Code' field with the placeholder text 'Enter This If Applicable'.

TEAM: Is it possible to validate phone number as per below logic:

P2

Is it possible to validate phone number as per below logic:

00971559313001 – VALID

0097145208600 – VALID

+97145208600 - VALID

0559313001 – VALID

NOTE: PLEASE CONSIDER WE SHOULD ALLOW ANY VALID PHONE NUMBERS FROM ALL COUNTRIES / REGIONS.

| | |
|--|---|
| Phone Number * | Comments |
| <input type="text" value="123"/> | <input type="text" value="aaq"/> |
| <div> Please match the requested format. provide a valid phone number</div> | Auth Code |
| <input type="text" value="Auth code"/> | <input type="text" value="Enter This If Applicable"/> |

TEAM: Is it possible to add one more field – a field for region – listing all the Countries?

Course Overview

Course Details

Prerequisites

Features

Technology: Programming

Course Overview

This course teaches IT Professionals how to manage their Azure resources, including deployment and configuration of virtual machines, virtual networks, storage accounts, and Azure AD that includes implementing and managing hybrid identities. You will also learn how cloud resources are managed in Azure through user and group accounts, and how to grant access to Azure AD users, groups, and services using Role-based access control (RBAC).

You will learn about the different storage accounts and services as well as basic data

[Show More](#)

Course Details

Module 1: Managing Azure Subscriptions and Resources

In this module you will explore Azure monitoring capabilities using Azure alerts, Azure activity logs, and Log Analytics. You will learn to query, analyze, and interpret the data viewed in Log Analytics.

After completing this module, students will be able to:

- Managing Azure Subscriptions and Resources

Module 2: Implementing and Managing Storage

[Show More](#)

Prerequisites

Successful Cloud Solutions Architects begin this role with practical experience with operating systems, virtualization, cloud infrastructure, storage structures, billing, and networking.

TEAM: We need to be able to download the course details/content in PDF format.
